Our Readers' Views

WASHINGTON REDS

It is difficult to say how much gratitude I, as a patriotic American, feel for Guy Richards' marvelous expose of the Red enemies in our government! For many years we have felt frustrated anger at the foreign policies of our State Department, but never was anything done about it. Now SOMETHING has to happen, thanks to Guy Richards.

I hope you will continue to press for a public hearing and confrontation of all the accused, so that this won't be swept under the rug, as was the Otto Otenka case.

ROBERTA J. PRICHARD

Chicago

I commend the Journal-American for its courage to enlighten the American people about the infiltration of Communist agents into United States Government agencies. The majority of people are too apathetic about this vital problem. We need more of this type of information to combat the growing menace of communism and the "I don't care" attitude of the American people. It is time to let our Congress-

men know that we will not stand idly while this great and free country is allowed to be buried.

EILEEN McCAULEY

Jersey City

It is heartening to know, and it must give Mr. Richards the greatest satisfaction, that action will be taken to rectify this shocking situation.
